Master's Bac+5
Business Analytics

Arabic · French · English

PROFESSIONAL SUMMARY

Data Analyst with a Master's degree in Business Analytics (Bac+5) and a dual background in Software Engineering and Business Intelligence. Experienced in designing end-to-end data solutions: data collection, cleaning, modeling, and visualization through Power BI, Tableau, and Python. Proven ability to translate complex datasets into actionable insights for operational and management teams. 10+ years working in high-demand international environments have built strong communication, rigor, and cross-cultural collaboration skills. Actively seeking a data analyst role in France or remote; work authorization process underway.

CORE COMPETENCIES

Data Visualization	Power BI (PL-300 prep), Tableau, Looker Studio (learning), DAX, Power Query
Data & Databases	SQL, MySQL, SQL Server, Oracle, BigQuery (learning), ETL with Talend & SSIS
Programming	Python (pandas, scikit-learn, NLP), R, PL/SQL, C++
BI & Analytics	Machine Learning, Sentiment Analysis, Predictive Modeling, KPI Reporting
Dev & Frameworks	React.js, Node.js, Flask, Express.js, Zend Framework, .NET
Methodologies	Agile / SCRUM, GANTT, Data Documentation, User Training
Office & Tools	Excel (advanced), PowerPoint, Google Workspace, Anaconda, R Studio, Colab

CERTIFICATIONS

- Microsoft Power BI — PL-300 Certification Prep (Data Analyst)
- Python for Data Science and AI (IBM)
- Python Project for Data Science
- Data Science Orientation
- Introduction to Data Analysis
- GenAI Chatbots — OpenAI
- TOEIC (English proficiency)

PROFESSIONAL EXPERIENCE

Data Analyst | IA4U Research Unit — ESB Esprit School of Business — Tunis

Jan 2023 – Dec 2023

AI-powered academic orientation platform — Full stack development within a research unit dedicated to student support tools.

- Designed and deployed an AI-based study path recommendation system to guide students toward career-aligned academic programs
- Built the front-end interface using React.js; developed the back-end with Node.js, Express.js, and Flask
- Managed the MySQL database and ensured data integrity throughout the application lifecycle

- Worked in an Agile (SCRUM) team with iterative delivery cycles

Stack: React.js · Node.js · Express.js · Flask · MySQL · Python · SCRUM

Data Analyst — Predictive Analytics | ESB Esprit School of Business — Tunis

Jul 2022

Social media performance forecasting — decision-support system for Facebook engagement prediction.

- Extracted, cleaned, and preprocessed Facebook page data using Python and SQL Server
- Built NLP-based sentiment analysis pipeline (positive / negative / neutral classification)
- Developed and evaluated predictive ML models for user interaction forecasting (accuracy, precision, recall, F1-score)
- Automated data collection, preprocessing, and prediction pipeline for real-time updates
- Deployed the solution into a production environment for operational decision-making

Stack: Python · SQL Server · SSIS · Visual Studio · SSMS · GANTT

Data Analyst — BI & Reporting | ESB Esprit School of Business — Tunis

Nov 2021

- Sourced and cleaned a large US flight delays dataset from Kaggle (multi-year, multi-airline scope)
- Designed database schema, standardized formats, and handled missing values systematically
- Built interactive dashboards in Power BI and Tableau to visualize delay patterns by airline, route, and time

Stack: Talend · Power BI · Tableau · MySQL

Software Developer (Internship) | W3S Consulting — Rennes, France

Feb 2014 – Jul 2014

- Developed a student traceability web application with 5 modules: Social Networks, EDM, CV, Administration, Institution
- Managed full project lifecycle: requirements, database design, development, testing, and UX/UI improvement

Stack: Zend Framework 2 · PHP · MySQL

Senior Flight Attendant | Qatar Airways — Doha, Qatar

Sept 2015 – 2026

10 years in a high-performance international environment — skills directly transferable to data and client-facing analytical roles.

- Managed complex, high-stakes operational processes with strict quality and compliance standards — directly applicable to data governance and reporting rigor
- Collaborated daily in multicultural teams spanning 130+ countries, building cross-cultural communication skills valued in international analytics teams
- Developed crisis management, adaptability, and autonomous decision-making under pressure

EDUCATION

2021 – 2023	**Master's degree — Business Analytics (Bac+5)**	Esprit School of Business
2014	**Engineering Degree — Software Engineering**	Institut Polytechnique Central Privé
2011	**Bachelor's degree — Management Information Systems**	Higher Institute of Management
